Using InterCall's Webcast Studio for Android to Attend a Webcast

- Participant registers for event via desktop or Android device using the URL provided by the event organizer.
- Upon successful registration, participant receives confirmation email.
 - If registering from an Android device at the time of the event, they will receive a prompt to download the application and immediately enter the event.
 - If registering prior to the event, they will receive an email with a prompt to download the application and a link to join at the appropriate time.
- At the time of the event, if the application has not yet been downloaded and participant attempts to join, they will be prompted again to download. Upon downloading, they will be able to join by clicking the link supplied by the organizer.

FREQUENTLY ASKED QUESTIONS

How do I access Webcast Studio for Android?	Search Google Play for "Webcast Studio" or use this URL https://play.google.com/store/apps/details?id=air.com.intercall.webcaststudio
I clicked on the application icon to view my webcast but it did not open.	The first time you enter a webcast, you must enter via a log-in page. If you do not have the URL to the log-in page, check your registration email confirmation or contact the event coordinator. You can re-enter recently attended webcasts by tapping on the application icon.
When watching an on-demand webcast, how do I use the video slider bar to move forward or back in the presentation?	To drag video sliders or elements, touch and hold for more than one second, then drag to your desired position.
I get a server connection error upon logging in.	The port your application is configured to use may be blocked or preventing the necessary connection. If you are unable to connect, change the port setting, close the application, and log in again.
Why does my performance seem to differ from time to time?	Performance will vary depending upon the strength and capacity of the network your device has connected to, and the number of other users on the same network. For optimal performance use a WiFi connection with an average speed of at least 2Mbps.
Can I host a webcast from my mobile device?	The application supports participation as an attendee only, not as a speaker/presenter or organizer.
